### **Information Regarding Texas Privacy Laws:**

Effective September 1, 2012, the Texas Medical Records Privacy Act provides additional protections to consumers. The Act is broader in scope than HIPAA because it applies not only to health care providers, health plans and other entities that process health insurance claims but also to any individual, business, or organization that obtains, stores, or possesses PHI as well as their agents, employees and contractors if they create, receive, obtain, use or transmit PHI.

Additionally, Texas law specifies that if the provider is using an electronic health records system capable of fulfilling the request, the records must be provided not later than the 15th business day after the date your provider receives your written request. The records must be provided to you in electronic form unless you have agreed to accept the records in another form.

Other Texas laws also serve to protect from disclosure specific types of medical records and information including certain doctor-patient communications, genetic information, test results for HIV and AIDS, hospital records, pharmacy records, donor records, regulatory records and mental health records. To learn more about those laws, see here:
